Adopt - A - Spot

The Burin Peninsula

**A GREAT PLACE TO LIVE
AND DO BUSINESS**

Team up to clean up!

People take great pride in watching their gardens bloom into something beautiful. Adopt-A-Spot is an exciting opportunity to share that feeling and beauty with everyone while keeping your town clean.

The Adopt-A-Spot Program is a well-established initiative dedicated to creating and enhancing awareness of our environment, and instills a strong sense of pride in our community.

This is an area-wide program which is coordinating efforts to reduce litter as well as organize beautification and restoration projects to make the Burin Peninsula one of the most attractive areas in our province.

Let's get started!

Why Adopt?

Participation in this program provides a great opportunity for friends, neighbours, organizations and businesses to work together.

It can be a great form of publicity, showcasing a business's community involvement.

Adopting a spot is also a great family summer activity.

This initiative provides youth with an opportunity to enjoy the outdoors while contributing to their awareness of our responsibility towards our environment.

The most important reason for getting involved is to keep our communities beautiful and welcoming places for our families and future generations to share.

Do you know a neglected area in your town that could use a little Tender Loving Care? This is your chance to show your pride in your community.

The site you adopt can be of your own choosing, or one recommended by us. The selected areas around town include those in need of enhancement to further add to the beautification of the Burin Peninsula. Your commitment can be small or large, and for any appropriate length of time.

We will acknowledge your commitment to keep the spot free of litter and make other improvements.

A sign featuring your name will make your efforts known to all who enjoy the area you have adopted.

How to sign up

Please fill out the application and mail or fax it to the Chamber office.

Thank you
